

# **nuaire Wall-Mounted GENIE Model Features**

1. The model uses a type catalogue so all models in wall-mounted GENIE range can be inserted using the same .rfa file (see Read Me file attached for further info)

The genie\_wall.rfa model attached includes the following option in the Model Properties Category in the Properties Window

2. These models are face-based models and must be inserted onto an existing ***interior*** face or work plane in the project.
3. The 'Recess Mounted' tick box allows you to change the mounting method of the fan from surface to recessed as shown below:
