

nuaire XB2-5 Revit Model Features

1. These models use type catalogues so all sizes of the XB2-5 range using the same heating coil option (LPHW, electric or none) can be inserted using the same .rfa file (see Read Me file attached for further info)

XB2-5-L.rfa holds all the **L**PHW heater versions on the unit e.g. XB3-RL.

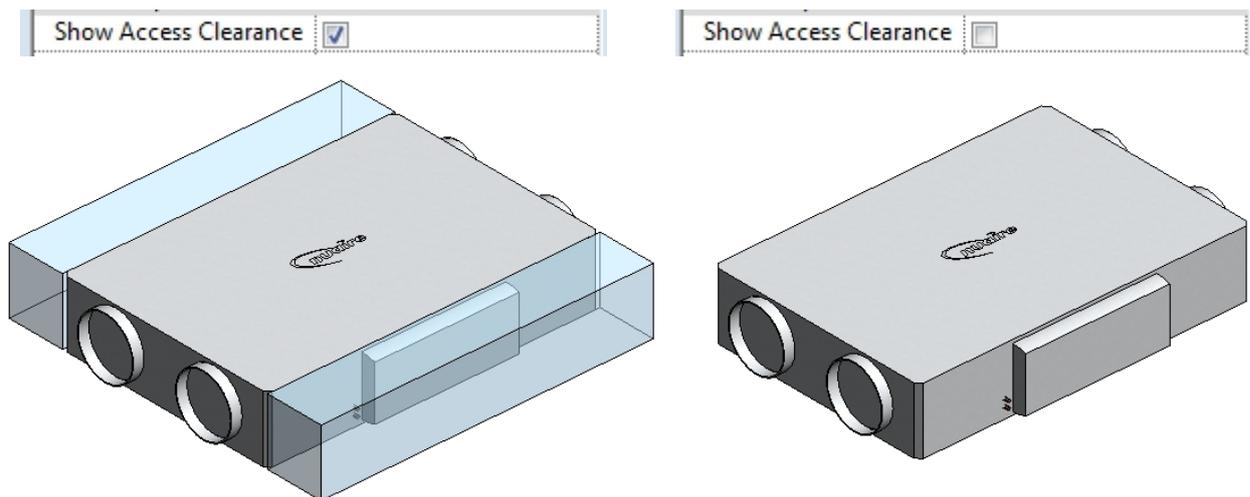

XB2-5-E.rfa holds all the **e**lectric heater versions on the unit e.g. XB3-RE.

XB2-5-N.rfa holds all the **n**o heater versions on the unit e.g. XB3-RN.

Each model includes the following options in the Model Properties category in the Properties window.

Model Properties	
Show Supply Silencer	<input type="checkbox"/>
Show Intake Silencer	<input type="checkbox"/>
Show Extract Silencer	<input type="checkbox"/>
Show Discharge Silencer	<input type="checkbox"/>
Show Access Clearance	<input checked="" type="checkbox"/>

2. 'Show Access Clearance' allows you to show or hide the access clearance transparent area of the model. The clearance areas will still be present for collision detection even if turned off.

3. You can also choose to show silencers using the tick boxes below. These will schedule as individual duct accessories objects.

Model Properties	
Show Supply Silencer	<input checked="" type="checkbox"/>
Show Intake Silencer	<input checked="" type="checkbox"/>
Show Extract Silencer	<input type="checkbox"/>
Show Discharge Silencer	<input checked="" type="checkbox"/>
Show Access Clearance	<input checked="" type="checkbox"/>
