

# Fault Finding Instructions For Nuairé Domestic Products

Nuairé products are manufactured to the highest Quality standards within our I.S.O. 9001, B.S.I. assessed design and manufacturing environment.

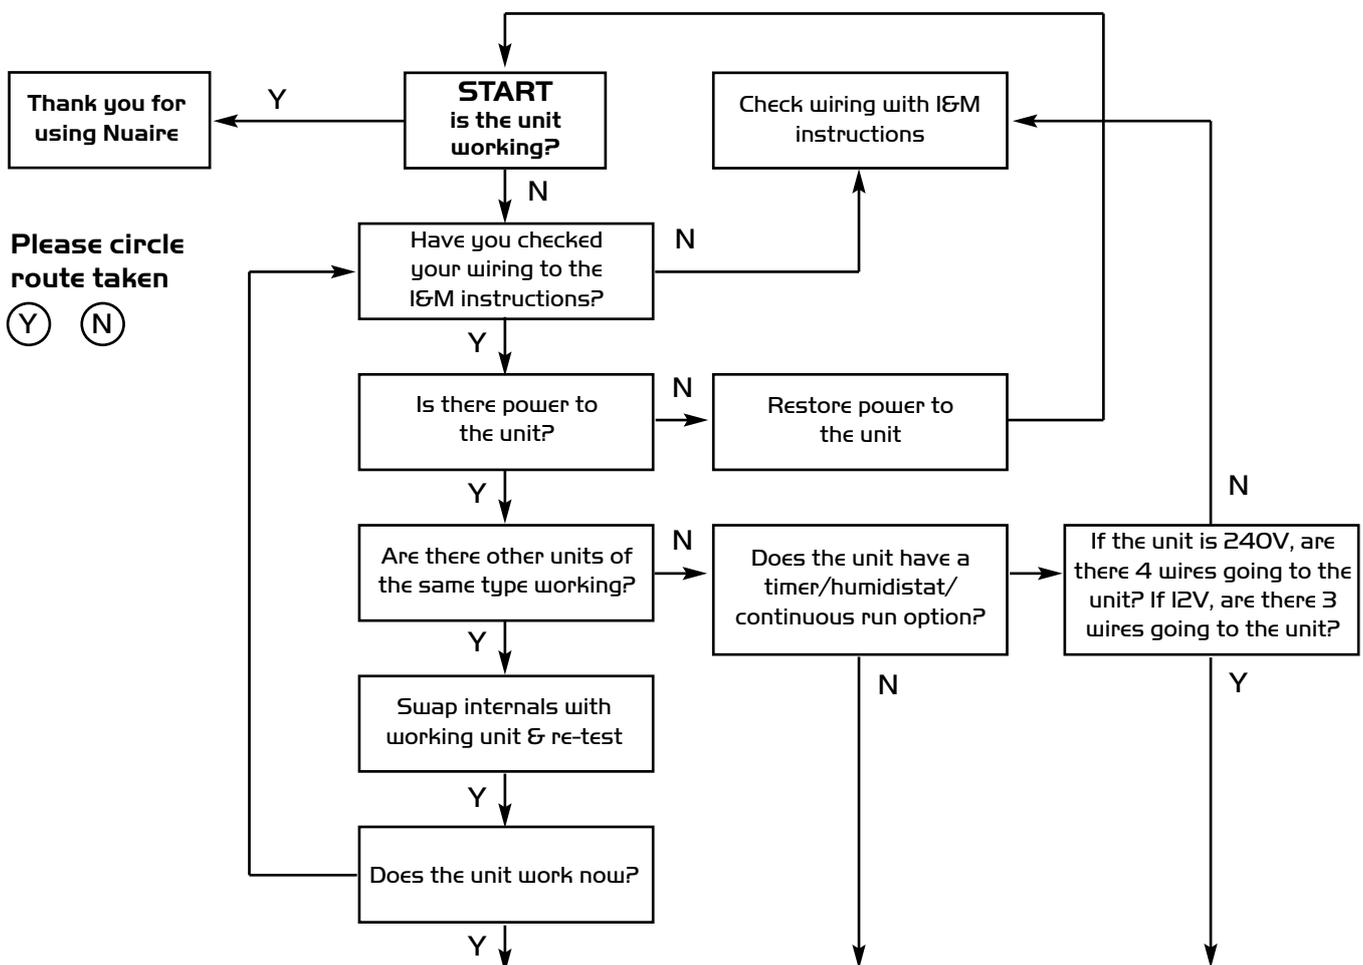

However, should you have any problems regarding the installation of the product, please follow the "fault finder" below circling the route taken (Y, N).

If after completing the diagnostic check, you cannot get the unit to function correctly; **please do not return the unit.**

First, complete the form section at the bottom of this page and Fax the page to us.

On receipt of the completed form we will contact you with instructions for the units return.
